Our experience with hundreds of small and medium business clients means you will get the most value out of your IT investment.

About the Company:

Established in 2001, Accelerated Network Solutions is a leading provider of IT support for small and medium sized businesses. Our seasoned experts have your bottom line in mind, working to transform IT into a strategic and revenue generating part of your business. We provide the knowledge and hands-on resources to identify, design and implement unique IT solutions that align with your business needs and objectives. Our commitment to service, accessibility and rapid response will keep you miles ahead of the curve. Accelerated Networks serves hundreds of single and multi-location customers in Colorado's Front Range and across the country. We credit our success to our integrity, professionalism, and proactive approach to customer service.

Services:

Accelerated Networks offers a broad range of IT support solutions to help your company achieve its technology goals.

- Network Management
- Managed Services
- Professional Services
- Systems Integration
- IT Outsourcing
- Database Development
- Help Desk
- Regulatory Compliance
- Business Continuity/Disaster recovery

Value:

Accelerated Networks is committed to helping companies generate value in IT by creating secure and manageable business environments with measurable profitability. From general IT support and Help Desk assistance to creating more complex custom systems and solving security concerns, Accelerated Network Solutions provides the all the services to elevate your company's IT results. More than an outsourced provider, we aim to be your partner for future growth and success.

> *"We have used Accelerated Network Solutions several times over the last two years to augment our staff and provide expertise in Microsoft Exchange and other IT administration. Each time we have received prompt and knowledgeable assistance for the project and have been extremely satisfied."*
