Microsoft Exchange Server is a crucial component of many companies communication and collaboration activities.

The professionals at Accelerated Network Solutions are your partners for consulting, technical support and streamlined managed services such as assessment, migration, disaster recovery, hosting, and e-mail protection. Accelerated Networks can help you optimize your Exchange software so that your staff can focus on other crucial projects.

Accelerated Networks Exchange services include:

Consulting:
• Migration / Upgrades
• Disaster Recovery
• Design/Implementation
• Handheld Integration

Managed Services:
• Archiving & Retention Compliance
• Comprehensive Application Monitoring
• Mail Protection Services (Spam/Virus/Server Availability)
• Hosted Exchange Server Solution with Optional Handheld Support for BlackBerry, TREO, or Windows Mobile Device.

For small businesses who want to benefit from the features of Exchange Server with lower up-front investment and built-in daily backup, we offer a managed service solution that enables you to run this software over the internet by connecting to a large data center. This option enables you to integrate your handhelds (Windows mobile, BlackBerrys and Palm TREOs) with complete wireless synchronization of your e-mail, contacts, and calendar with your Exchange mailbox.

Contact Accelerated Networks today to learn more about our technical expertise, practical experience and world-class service, that can help you create and implement highly effective IT solutions.
